GIVE HIM A CHANCE.

The new Emperor of Germany comes to the throne burdened with suspicions and beliefs that he meditates a reactionary and warlike policy.

Some bombastic speeches made in th past give color to these fears. But WILLIAM II. is entitled to the suspended judgment and the fair chance that should be accorded to all men coming into high positions.

Responsibility sobers and steadies me The hot-headed son of a Crown Prince is one thing. An Emperor is quite another. The Conservative party is powerful in Germany. BISMARCE's iron hand still wears the velvet glove. With all his sourage, the Prince does not want to provoke either foreign war or a Socialist uprising.

Give the young Emperor a chance,

PARK EXTENSION. Mayor Hewirr is entitled to high praise for the interest he has taken in securing an

extension of the East River Park above Eighty-sixth street. The Board of Street Opening voted in favor of the purchase recommended by the Mayor,

and the dwellers in the crowded residential portion of the city in that neighborhood will. get a much-needed addition to their "breath

One good turn deserves another. When is the bill passed last year to open small parks in place of pestilential tenementhouses in the lower part of the city to be carried into effect? No public improvement is so much needed as is this.

HELP THE YOUNG WOMEN.

No association of its size does more good in this city than the Young Women's Chris-It ought to have ten times its present men

bership and tenfold its presentin come.

If there is any class in the metropolis that needs a helping hand and the benefits of asdation for mutual aid and protection it is the self-supporting young women.

Every religion ought to furnish eyes to watch, hands to help, tongues to counsel and feet to serve the young and inexperienced girls who are cast into the sharp competitions and thick temptations of great city.

A NOIBELESS PAVEMENT. That quiet little job to secure a noiseless

pavement in front of a club-house on Thirty. fifth street gives a hint to the public. If one cross street can have this luxury, why may not others? The infernal roar of the stone-block pavement is one of the

greatest drawbacks to a tolerable life in the city, especially in the summer, when the windows must be open. Except on streets where there is heavy carting a smooth 'pavement ought to be possible.

The poor are not provided with what CHARLES LAMB whimsically wished for earlids to shut out the noise. Pass around the luxury of noiseless pavements.

The Board of Electrical Control has hired an expert to do regularly the work which THE WORLD recently did for the public good He will inspect the wires and forbid their use when found dangerous to life or property. Where subways are completed the wires must go underground. It begins to look as though the "clamor of the press" had been heard and heeded.

The jocose friend who, during the blizzard last winter, greeted acquaintances with the query: "Is this cold enough for you?" turns up again now with "warm" substituted for cold. Drowning is too good for

Please let me know whether sentences can be used?

To Word-Suilding Editor Reening World: I wish to enter the word contest, but have only a limited education and fear that others more favored in knowledge will win. Please state whether, when a list is sent in, it will be rejected entire if one or more words contained in the list are misspelled or not in accordance with the rules governing the contest, or if the lists are revised and such objectionable words erased and the sender be

contest. A WORD-BUILDER. Nyack, N. Y., June 15. THE EVENING WORLD daily receives such a yast number of inquiries touching its Word-Building contest that it is utterly impossible to answer them all. In many instances the inquiries are duplicated, and an answer to one should be an answer to all like it. It has happened in all such contests, held in England and elsewhere, that a question may sometimes arise under the most careful and simplest of rules as to the admissibility of a word. We would suggest in this connection that when any competitor is doubtful about a word it be included in his or her list. When the lists are revised the utmost fairness will be used and the same treatment accorded to all.—IED. EVENIER WOLLD.

Some Valuable Pointers About His Playing.

(From His New Book on Baseball, Published

Another instance in which he may take th base is when there are runners on first and third and the runner on first starts for second. One way of making this play was described in speaking of "The Second Baseman "but it is believed that it may be much better done with the assistance of the the catcher signals whether he will make long or short throw towards second. When the runner on first starts down, the second baseman runs inside the diamond to a point in line with the base, and the shortstop goes to the base. If the throw is long the shortstop receives the ball and touches the runner, or returns it quickly to the plate if the runner on third starts in. If the throw is be short, so that the ball may best results. Each player must, however, understand his part and all work together. In a recent game against Philadelphia, on the Polo Grounds, Crane, who had never taken part in the play before, gave Fogarty a ball

On all hits to left and left centre fields the shortstop should take second, allowing the baseman to back up the throw, and on all hits to right and right centre the baseman will take the base and the shortstop attend to the backing up.

whereas, if he pushes his hands forward and the ball does not strike fairly, it will be

of steadiness, and to meant by "good form

SHORTSTOP.

If baseball diamonds were perfectly true

men, playing only for the team's success, there will never be any dispute.

Having secured a batted ball he should throw it at once, waiting only long enough to regain his balance and make sure of his aim The practice of holding the ball for a moment and looking at the runner, whether done to demonstrate the fielder's perfect sang froid or to make a swift and pretty throw for the benefit of the grand stand, is altogether wrong. Generally the throw will be to first, though sometimes there will be an oppor tunity to put out another runner, in which case it will be to some other base. In throwing to second or third, if he is near the base, he should pass the ball to the baseman by an easy, underhand toss. It is a difficult play to catch a thrown ball when the thrower is quite near; besides, in making double plays by way of second base, any time lost in tossing the ball will be more than regained by the quicker handling, and there is the additional inducement of safety. most always better to pass the ball to the baseman and allow him to throw to first than for the shortstop to attempt to make the play

for all such hits falling in his own position, and also all falling back of the third baseman and in short leit field.

With runners on bases, a double play may sometimes be made by allowing such a hit to first strike the ground. In order that the ball may not bound beyond reach, it should be caught or "picked up" on the short bound, and to do this safely requires a great deal of skill. It is a pretty play, and often of invaluable service, and it should therefore be practised carefully until it can be made with approximate safety. The shortstop must not betray beforehand his intention, but pretend that he is going to catch the ball on the fly. With all signals given by the catcher to the different infielders the shortstop must be perfectly familiar, in order that he may be prepared to do his part. If there is to be a throw to second or third he should know it, so that he can be ready to back up in case the throw is wide or breaks through the baseman's hands. So, too, he must know when

on one side of the runner, while the other baseman and the pitcher do the same on the other side. If it is between third and home, he and the third baseman attend to one side, while the catcher and pitcher look after the other. In every case the base-runner should be run down as quickly as possible, and always towards the base furthest from the home plate, so that if an error is made the runner will gain no advantage. will gain no advantage.

In backing up other fielders a shortstop may be of great serv ce, and he should do this mevery possible case, no matter where the play may be. But the positions which he is specially bound to back up are the second and third bases, not only on all throws from the catcher, but from any other fielder, where it is possible for him to get in line with the throw. He must not get too, cast to the

Past and Present of the Furniture and Carpet Employees.

A Union that Has Been Successful Without Strikes.

BY

WILLIAM H. TURNER. Chief Grand of the Furniture and Carpet Em.

ployces Social and Benevolent Association.

WRITTEN EXPRESSLY FOR THE EVENING WORLD. Knowing it to be the wish of THE EVENING WORLD that its readers shall be made acquainted with the doings of the different bands of workmen organized in and about

the city of New York, I take great pleasure in contributing my share towards that object. DIFFICULTIES IN ORGANIZATION. Prior to 1885 several abortive attempts had been made to organize the salesmen and others employed in our branch of business, one of its main objects being early closing. It was found to be quite impossible to advance with any degree of success with open meetings, and until its present leaders took the matter in hand the movement lagged

painfully. They organized the employees into a secret brotherhood, whose objects should be the amelioration of their condition as far as possible with unity of purpose and personal walfare, and also to strengthen and preserve a kind and fraternal feeling among them. SUCCESS OF THE UNION.

Greenberger, 17 Hudge set, Emil Sich, 98 Status at. 1 Park Warman, 144 Micros 124 Prince A. 1 Park Status 1-Francis Roselle, 9 From Petron Petron 145 Prince A. 1 Park Status 1-Francis Roselle, 9 From Petron Petron, 199 Citatus 1-Francis Roselle, 9 From Petron Petron, 199 Citatus 1-Status 1-Lord Roselle, 1 Park Status At that time, 1885, the retail furniture and

We are a perfectly independent organisation, but not antagonistic and stand on our own bottom. We have never had any strikes, moral sussion " in that respect being our motto. Wages are graded to a great extent by ability to perform the respective duties

o which we are devoted. STEADY WORK FOR ALL.

There are very few of our members out of employment, ours being a business where very few are discharged, and then only when in a great measure their own fault and indiscretion. A man who is sober and indusrious is quite sure of steady employment, and our object is to protect all such of our members and our wish to gain the respect and aid of our employers. If THE EVENING WORLD will kindly con-

tinue to assist us in the future as it has in the past, it will have the supreme satisfaction of knowing that it has done a great and glorious work in the cause of labor and humanity.

" What have you got in the snape of oranges

"Only round ones, sir!" The Kidneys and Liver

in good condition, and yet they are overworked and abused by nearly everybody, until they become worn-out, clogged up, or diseased. Hood's Barasparille cures all difficulties with all difficulties with these organs, rouses them to healthy action, and tones the whole digestive organism. The following is from a well-known Brooklyn lady, the wife of Mr. L. M. Ohly, of the firm of Ohly, Schmidt & Marsh, commission murchasts at No. 85 Warren st., New York City:

New York City:

"For eaveral years I suffered greatly from general debitty, bihousness and sick bescheckes with high fevers,
The doctors said I had materia, and that my liver was
out of order. They prescribed for me, but I received

Hood's Sarsaparilla Sold by all druggists, \$1; six for \$5. Prepared only by O. I. HOOD & CO., Apothecories, Lowell, Mass.

mine. I had taken Hood's Sarsaparilla less whim my appetite began improving, my sick headso trace less violent, I began to feel stronger and ener aged, the fever came at longer intervals and I improaged, the lever come at longer invertee and taking Hood's Barcaparilla I was strong enough to walk for two hours with my husband and child in Proceeds Park without feeling fattgued, and acon after I fels better than I ever did. We now take Hood's Saruaparilla over apring—my husband, child and I, and sometimes in the fall and the transport the pring that have no more thoughts of ill health."

Hood's Sarsaparilla Sold by all druggists, \$1; six for \$5. Prepare by C. I. HOOD & CO., Apothecaries, Lowell, M. 100 DOSES ONE BOLLAR

THE SHORTSTOP

JOHN M. WARD.

Special Arrangement.) (CONCLUSION.)

shortstop. With runners on first and third, short the second baseman receives the ball and returns it to the catcher; or, if the runner on third does not start home, the baseman may still have time to turn and toss the ball to the shortstop to catch the rnnner from first. In deciding to give the signal for a short or long throw, the catcher is guided by the cir-cumstances of the case and the situation of the game. If one run is going to materially affect the result of the game, the throw will it had struck a stone.

The use of a glove on one hand may be found helpful in counteracting the effect of surely returned to the catcher before the runner from third scores. If the run is not vital, the throw may still be short if the runner at third is speedy: but if he is slow and not likely to chance the run home, the throw will be all the way to the shortshop to put out the runner from first. The success of the play lies in the fact that the runner on third can never tell, until too late, whether the play is to be short or long. The play was first made in this way by Gerhardt and myself in 1886, and during the past two seasons it has been tried n the New York team many times with the

stop position, left unguarded by my having gone to cover second base.

within reach and he hit it through the short-

In fielding ground hits the shortstop should observe the general princi-ples for such plays, He should if possible get directly and squarely in front of every hit, making his feet, legs and body assist in stopping the ball, in case it gets through his hands. If the ball comes on a short bound," he should not push the hands forward to meet it, but having reached forward, "give" with the ball by drawing back the hands in the direction the ball should bound. In this way if the ball does not strike the hands fairly, its force will at least be deadened, so that it will fall to the ground within reach of the player;

driven too far away.

sible, so that if fumbled he may still have time to recover the hall and make the play In running in to meet the ball he must not forget the importance this end should get himself in proper form just before the ball reaches him. What is

may be seen by the

above cut. The feet, legs, hands, arms and body are all made to assist in presenting ar impassable front to the ball.

the bound of the ball might be calculated with mathematical precision, but unfortunately they are not and these precautions be There should be an understanding between

the shortstop and third baseman that the latter is to take all slow hits towards short, and as many hard hits as he can fairly and safely field. The effect of the baseman's covering ground in this way is to allow the shorttop to play a deeper field and further towards second base. Some players do not like the idea of another fielder taking hits which seem more properly to belong to themselves, but this is the correct way for a shortstop and third baseman to work, and between two

It is always best, when possible, to use both hands to stop or catch a ball, but sometimes a hit is so far to either side or so high that it can only be reached with one hand. Therefore, a shortstop should practise one-hand play so that he may be able to use it when the emergency requires. He should never attempt it at any other time.

In making double plays to second it is al-

alone. In 1882, a couple of weeks before the | delp

Mr. Chris Cross-Say, love, a gen'leman just brought me home all right!

Mrs. Cross—Oh. thanks; and now, if he is not too tired, I'd like to have him take you away

and found all the seam occupied)—Don't cry, "Sandy," yous kin have my seat. Prominent Hotel Arrivals . Threaher, of Providence, R. L., is at Alexander Preston, of Baltimore, is under the St. James Hotel roof. Rev. Dr. Wilson, of Clarksville, Tenn., and Bishop Spanlding, of Denver, Col., are at the Sturtevant House.

Arrivals at the Albemarle include W. G. Purdy, one of the representative railroad men of Chicago, and Chas. E. Stration, of Roston.

Rear-Admiral Edward Simpson, U. S. N., and H. M. Caldwell, one of the first settlers of Birmingham, Als., are stopping at the Grand Hotel. The Gilsey House has M. Mandeville, of the Paris Figure; Mayor A. A. Ames, of Minneapolis, and W. C. Pullman, nephew of the Chicago Palace carbuilder.

The Hoffman House register shows the names of william A. Minuser, U. S. R., and Carl Faber, one of the family of pencil-makers, from Naremberg, sermany. Speacer Fremont Cole ran down from Watkins rhis moreting on the "dyer." His name and that of Dr. D. P. Finner, of Guntemale, are on the Fifth Avenue register. Congressman and Mrs. H. Cabot Lodge, of Massachusetts; Mrs. Cuthbart Stocomb, of New Orleans, and Dr. J. M. Robins, of Philadelphis, are at the Hotel Brunswick.
